

Technology in Education

How Much is **TOO MUCH**...??

Topics of Discussion

01

A Peek at the Tech World

- Present state and immediate future of technology in education

02

Adoption - What and What Not?

- Algorithm for decision making

03

Adaption - How?

- A simple sequential guide to implementation

04

Conclusion

- Take Home Message

Present State & Immediate Future

Technology in Administration

ERP – Enterprise Resource Planning

Basic Areas Covered by All Software

- Admissions and student data
- Attendance management and reporting
- Management
 - Finance
 - HR
 - Purchase, Stores, Inventory management
 - Generation of various reports

Support Services

- Security
 - CCTV, ID cards, Child Tracking
- Transport – GPS enabled
- Parental Collaboration - SMS, WhatsApp, CCTV Feed
- Marketing
- Media and Social Media - Website, FB page, YouTube Channel

Technology in Administration

- No direct influence on 'Academic Performance'
- Decision making depends on multiple factors
 - Location, branches, finances, staff readiness
- Multiple options available – varying costs
- Look for customization and scalability

Technology in Academics

Companies Providing Digital Content

The Transition

Classroom Structure

Blackboard

Smart Board and Tablets

The Transition

Collaboration

**Online
Community**

**Cloud
Storage**

MOOCs

Massive Open Online
Courses

**Personalized
Learning**

Technical

Soft Skills

Skill Development

Technological

Life Skills

MakerSpace - Integrated Learning and Skill Development

combines features of

- Science Labs
- Art Studios
- Computer Labs
- Robotics
- Electronics
- Wood Work
- Metal Shops

The Future

Future Technology Being Customized for Learning

**Virtual
Reality**

**Artificial
Intelligence**

**3D
Holograms**

**Robotics
& 3D Printing**

Adoption of Technology

A Few Points to Ponder

*Is Education only about
Knowledge and Skills?*

*What is the Effect on
'Body' and 'Soul'?*

*What will be the status
of Student-Teacher
relationship?*

*Will we not need
schools in the future?*

*What is the stand taken
by Islamic Shariah
On Technology?*

Algorithm for Decision Making

01 - Is it Inevitable?

Ex: Digital Content

Is it going to become universal?
Is there any alternative?

Algorithm for Decision Making

02 - Is it Important?

Ex: Tablets for kids

Is it an improvement or is it just 'old wine in a new bottle'?
Will it improve student performance?
Will it ease the teachers' work?

Algorithm for Decision Making

03 - Is it Islamic?

Ex: Online Community

Is it Shariah Compliant?

Does it corrupt the mind, body or soul?

What are the control mechanisms?

Who decides 'right' and 'wrong'?

Algorithm for Decision Making

04 - Is it currently **Implementable?**

Ex: Tinkering Lab

Do you have the Time and Money?

Do you have necessary support infrastructure?

Are your teachers ready?

Adapting to Change

Set Time Bound Sequential Targets

- Farz
- Wajib
- Sunnah
- Nafil
- Mustahab
- Mubaah

- Makrooh
- Haraam

Level 1 – Must for All

- Computer Lab
 - Planned Curriculum
 - Trained Teacher
 - Teach Typing

Reading and Writing Tool

Level 2 – Preferable for All

- Audio-visual aids
 - Projectors in classroom
 - Portable trolleys
- Digital content for teachers
 - Free online content
 - One time purchase customized content
 - DO NOT buy commercial content

Portable Trolley

Level 3 – Preferable, But Not a Necessity

- Smart Board and interactive screens
- Assessment and evaluation – data and report generation

- Skill development Labs
 - Collaboration with industry
 - Customize
 - Do not commercialize

Smart Marker

Level 4 – Better to Wait

- Digital content for students
 - Needs monitoring
 - Safety issues
 - Ethical issues
- Virtual Lab, 3D Holograms, VR, AI, 3D Printing, Makerspace
 - All are in experimental stage
 - No proven results
 - Adverse effects not yet publisized

Conclusion – Take Home Message

- 01** Technology in Education is in a Stage of Transition / Revolution
- 02** Focus on Tarbiyah is Missing
Importance of Teacher is Undermined
Technology is only a Tool. User is More Important.
- 03** Everything New is Not For You
Follow the 4i Algorithm
- 04** Better to Adapt Early Than Being Outdated
Set Time Bound Sequential Goals

From inability to let well alone; from too much zeal for the new and contempt for what is old; from putting knowledge before wisdom, science before art and cleverness before common sense; from treating patients as cases; and from making the cure of the disease more grievous than the endurance of the same, Good Lord, deliver us.

— *Sir Robert Hutchison* —
