AI Tools for Teachers

Overwhelmed by the ever-growing list of AI tools? No need to stress – we've done the work for you! Our blog rounds up the latest and greatest innovations, organised specifically for teachers.

Given that around 2000 new AI tools were launched in March alone, it's nearly impossible for teachers to stay updated on the latest and greatest tools. After all, we want AI to lessen our workload, not add to it with constant innovations. To help, I've compiled a list of the best AI tools for teachers, categorised and summarised below. Stay tuned for more blog posts where I will be testing and comparing these tools, but for now, this serves as a landscape review!

AI Tools – Conclusion

AI tools are **experts** in a specific task

AI tools should not be used as a **slave** we being the **master**

Or

else one day we will become **slave** and AI tools as **master**

In this era of AI, giving **home work** to children is useless instead make them **work in school**
